

WOOD FINISHING (Skill)

This classroom and hands-on wood finishing class includes: the proper preparation of wood; methods of using stains, dyes, glazes, and toners to color wood; and understanding why and how to apply oils, shellac, lacquer, varnish, polyurethane, and water base coatings using rags, brushes, and spraying equipment. How to create the desired sheen and maintain that sheen will also be covered. Problem solving and repairing finishing defects such as blotching, orange peel, and fish eye will be explained. An introduction to wood touchup and repair is included. Students will keep all of the sample panels they produce.
